

DURGESH VISHWAKARMA

Full Stack Developer | MERN Stack | React Native | Node.js | AI Integration
Mumbai, Maharashtra | +91 7972109103 | durgesh103v@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Full Stack Developer with 2 years of experience building web and mobile applications using React, React Native, Node.js, Express, MongoDB, and PostgreSQL. Experienced in REST API development, authentication and authorization flows, admin modules, booking/e-commerce systems, and AI-assisted features, with hands-on unit and integration testing to support reliable, production-ready releases. Comfortable working across the stack — debugging frontend state, API responses, backend logic, and deployment issues — while writing clean, reusable, well-tested code.

TECHNICAL SKILLS

Frontend: React.js, React Native, Next.js, JavaScript, TypeScript, Tailwind CSS
Backend: Node.js, Express.js, REST APIs, JWT Authentication, RBAC, Request Validation
Databases: MongoDB, Mongoose, PostgreSQL, Supabase
Testing: Unit Testing, Integration Testing
Tools & DevOps: Git, GitHub, Postman, Docker, Docker Compose, Vercel, Render
AI / Other: Hugging Face API, AI API Integration, AI-Assisted Debugging & Documentation

EXPERIENCE

- Full Stack Developer — Servora, Mumbai, Maharashtra** *Nov 2025 – Present*
- Build and maintain client-facing web applications with React/Next.js, developing reusable components, responsive layouts, and API-driven interfaces.
 - Design and develop Node.js/Express REST APIs for authentication, admin workflows, content management, and booking-related business modules.
 - Write unit and integration tests alongside feature development to catch regressions early and improve release confidence.
 - Model, query, and debug data across MongoDB and PostgreSQL, handling payload validation and backend logic for data-driven features.
 - Integrate third-party and AI-assisted APIs with robust loading, error handling, and response validation using Git, Postman, and Docker in daily development.
- Trainee Analyst Engineer — Deloitte USI, Mumbai** *Jul 2024 – Oct 2025*
- Developed MERN-based e-commerce features end-to-end using React.js, Node.js, Express.js, and MongoDB in a client-server architecture.
 - Built secure RESTful APIs with JWT authentication, RBAC, request validation, and centralized error handling using a reusable service/controller pattern.
 - Implemented product listing, search/filtering, cart/order, user profile, and admin flows with reusable, performance-optimized React components.
 - Wrote unit and integration tests to validate API behavior and core application logic, contributing to release stability and fewer regressions.
 - Collaborated in Agile sprints — Git/GitHub workflows, peer code review, bug fixing, and documentation — supporting release validation.

SELECTED PROJECTS

- AI Notes Manager** — *MERN Stack, Hugging Face API, AI API Integration* | [Live Demo](#)
- Built an AI-enabled notes app with summarization, tagging, search, and structured note models across responsive screens.
 - Integrated AI-based summarization via backend endpoints, handling loading, failure, and retry states, with searchable metadata for fast retrieval.
- ShopSphere** — *React.js, Node.js, Express.js, MongoDB, Tailwind CSS* | [Live Demo](#)
- Built product listing, search/filtering, cart, wishlist, order, profile, and admin screens for a full e-commerce flow.
 - Implemented JWT authentication, password hashing, protected REST APIs, request validation, and rate limiting for secure access.
- Snapwake Alarm App** — *React Native, Expo, Node.js, Android Native Integration*
- Built a React Native alarm app with onboarding, permissions handling, alarm creation, and challenge-based verification screens.
 - Implemented camera-based challenge verification with Android alarm/notification handling and persistent ringing logic across trigger, challenge, and result screens.

EDUCATION

Bachelor of Engineering, Computer Engineering *Jan 2020 – May 2024*
Mumbai University | CGPA: 8.50

ACHIEVEMENTS

- Solved 150+ problems on LeetCode and GeeksforGeeks, covering arrays, strings, hashing, and sorting fundamentals.
- Maintained public GitHub projects spanning MERN, React Native, AI API integration, TypeScript, authentication, and Docker.
- Improved documentation and setup instructions across projects to streamline onboarding and review.
